SUMMARY

M.S. Computer Science candidate with hands-on experience in Java, Advanced Java, Python, SQL, full-stack development, REST APIs, database-backed systems, and data transformation workflows. Skilled in building backend services, authentication flows, MVC applications, SQL pipelines, and responsive web platforms using JavaScript, Node.js, Express.js, React.js, MongoDB, PostgreSQL, and MySQL. Strong foundation in OOP, data structures, algorithms, Agile delivery, debugging, and scalable application development.

EDUCATION

Pace University, New York, NY

Aug 2024 – May 2026

M.S., Computer Science | GPA: 3.60/4.00

Relevant Coursework: Data Structures & Algorithms, DBMS, OOP Java, Software Engineering, Machine Learning

St. Francis Institute of Technology, Mumbai, India

Aug 2020 – May 2024

B.E., Computer Engineering | CGPA: 3.10/4.00

TECHNICAL SKILLS

Languages: Java, Advanced Java, Python, SQL, JavaScript, C++, PHP

Java & Backend: OOP, Collections, Exception Handling, JDBC, Servlets/JSP, REST APIs, MVC Architecture

Full Stack: React.js, Node.js, Express.js, JWT Authentication, Responsive Web Design, API Development

Databases: MySQL, PostgreSQL, MongoDB, SQLite, Schema Design, Indexing, Query Optimization, NoSQL

DevOps & Testing: Docker Fundamentals, Git, GitHub, Postman, CI/CD Fundamentals, Unit Testing Basics

Data & Analytics: Pandas, NumPy, scikit-learn, Power BI, Tableau, Data Cleaning, Feature Engineering

Practices: Algorithms, Data Structures, Agile, Debugging, Code Review, Requirements Analysis, Jira

EXPERIENCE

Data Analyst Intern → Data Analyst Co-op | Indkan Worldwide Exim LLC

Jun 2025 – Dec 2025

- Designed SQL and Python data workflows using joins, CTEs, aggregations, and validation logic over 50K+ transactional records, improving reporting accuracy and retrieval efficiency.
- Built reusable transformation scripts and automated reporting pipelines, reducing manual processing effort by 25% and supporting recurring operational analytics.
- Developed 5+ Power BI/Tableau dashboards and backend SQL datasets to track customer behavior, revenue KPIs, and operational performance for stakeholders.
- Collaborated with cross-functional teams to translate business requirements into structured query logic, technical outputs, and decision-ready insights.

Data Analyst Intern | Relite

Dec 2023 – Apr 2024

- Analyzed 50K+ data points using Python and statistical methods to identify trends, improve decision-making accuracy, and support business planning.
- Built automated reporting tools and reusable data cleaning workflows in Python, reducing manual data processing time and improving analytical consistency.

PROJECTS

BulkCart: Full-Stack B2B Procurement Platform

Node.js, Express.js, PostgreSQL, Prisma, Docker, JWT

- Engineered RESTful backend services with role-based access control, tiered pricing, order state management, JWT authentication, and API workflows using Express.js, Prisma, and PostgreSQL.
- Designed normalized relational schemas with foreign keys, indexed queries, audit logging, invoice workflows, and transactional data models for multi-entity operations.
- Containerized the application with Docker Compose and seed scripts, supporting reproducible development and Agile-style iterative delivery.

LearnTrade: Full-Stack Stock Market Learning Platform

React.js, Node.js, Express.js, MongoDB

- Built a full-stack web application with JWT authentication, protected routes, REST APIs, MVC architecture, lesson delivery, quiz evaluation, and user progress tracking.
- Structured backend controllers, middleware, routes, and database models to maintain clean separation of concerns and support scalable feature development.

MiniQuery: Filter Query Engine

Java, Advanced Java, AST, Query Evaluation

- Designed a lightweight Java query engine that parses filter expressions into an Abstract Syntax Tree using recursive-descent parsing and evaluates predicates against structured records.
- Applied Advanced Java concepts including OOP design, collections, exception handling, modular class structure, and runtime evaluation logic.

PlaceEase: Centralized Job Placement Platform

MERN Stack, REST APIs, SQL

- Built a full-stack placement platform serving 500+ users and 30 employers with REST APIs, database-backed workflows, application tracking, and placement reporting.

LEADERSHIP & CERTIFICATIONS

Vice President | IIC | St. Francis Institute of Technology

Apr 2023 – Apr 2024

- Coordinated PRAGATI 2023 and UNNATI 2022 for 350+ attendees; managed 80 members and increased participation by 35%.

Certifications: Java Programming Certification | Walmart USA Advanced Software Engineering Job Simulation | British Airways Data Science Job Simulation | Google Project Management
